

## Maple Leaf Antique Outboard Club Membership Application

### ABOUT THE CLUB

Outboard motors have been manufactured for over 100 years. Therefore, it is no surprise that a number of people are interested in collecting them. You're not the only one interested in old outboard motors. There are lots of people of all ages that enjoy sharing the rewarding experiences offered by the non-profit Maple Leaf Antique Outboard Club. Your membership in MLAOC will provide you with a rich mixture of personal associations and accomplishments. You'll meet interesting new people, make new friends by corresponding with other members, and realize a great deal of satisfaction and pride from participating in displays, shows and Club Meets. While many members collect and restore motors, this is certainly not a requirement neither is owning an outboard of "Antique" status. Many just want help getting, or keeping, their own old outboard running; others just share an interest in old outboards.

### MAKE IT GO!

You'll be able to take a battered, worn, and grease covered old outboard and enjoy the fun and satisfaction of putting life into it. Those hard to find motors, parts, owner's manuals and instruction books are available to you through the Club resources. Furthermore, the club has fourteen Special Interest Groups to provide additional "know how" for your specific project.

Welcome to the MLAOC, we look forward to sharing our passion for antique outboard motors with you !
